

Exhibitors

Staples Business Depot

(Woodbridge)

Ask about their new products and services.

Thriftopia

Ask about safely disposing of your old electronics and their environmental initiatives.

Mobile Computer Services

Ask about their products, on-site service and web design.

Elizabeth Gillan's Art

Ask Elizabeth about her use of digital photography in the production of her water colour paintings.

Melvina's Touch

Ask Melvina about digital photography.

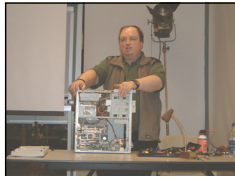

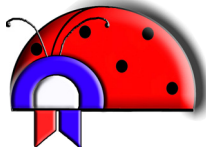

Re-Memories

Ask Paul about digital photography, video and restoring old media.

Barrie Users Group

Ask our members about anything related to information technology such as: genealogy, making family history books, buying a new computer, internet use and safety, digital photography, digital video, computer maintenance, etc.

Also ask us about the club.

Computer Special Interest Group

This group makes up the main body of BUG. Frequent question and answer sessions help members solve computer-related problems. Demonstrations of hardware and software also help educate members.

Special guest speakers help widen members' knowledge. Typical topics include tips and information on items such as Windows, Linux, Microsoft Office, web browsers, security, hardware issues and much more.

This group meets the first Tuesday of each month.

Digital Imaging Special Interest Group

This group explores the use of digital cameras, scanners and related computer imaging programs.

We learn through speakers, sharing our images, going on photo shoots and presentations in a relaxed learning environment.

No matter whether you have a point and shoot or a more sophisticated digital camera, there will be plenty of opportunities for you to have fun while learning and improving your skills.

This group meets the second Tuesday of each month.

Digital Video Special Interest Group

This small informal group meets to share techniques on the shooting and editing of digital video (DV). Members of this group have a good working knowledge of software suites such as Pinnacle Studio and Adobe Premiere Elements.

Out of their shared knowledge, a DVD on "Spring Cleaning" your computer was produced.

This enthusiastic group produces small video projects that hone their skills and knowledge.

They meet the third Thursday of each month.

Vintage Computers Special Interest Group

The Vintage Computer group is the current custodian of a vast inventory of software, hardware, peripherals, magazines and publications which was collected by the original core Commodore computer users group.

This material is being maintained and kept in working order to facilitate the formation of a computer museum of older computers when providence provides the opportune time. Members of the general public may make arrangements for a loan of this material.

Sharing Information Technology

Come SIT with us!

Saturday, October 25, 2008
Hours: 10 am - 5 pm

This special one-day event will be of interest to everyone who uses digital technology in their home or business.

This unique event will provide an opportunity for the community to see how to use various digital devices, media and learn "how to" skills. Speakers will talk about new products and technology.

Clear and accurate support is a key need for the purchasers and users of digital technology.

Come SIT with us and our exhibitors and ask your questions.
